

## Infrared -Thermography

discover insulation problems...

### Detection and evaluation of thermal irregularities

New building

Building before renovation

### Detection of covered construction elements

Half-timbered house

Armatures in a building

### Interior measurements

Ceiling insulation

Detection of insulation problems (with Blower Door)

Detection of construction elements

### Exterior measurements

Thermal leakages (industrial building)

Heat loss

Insulation problem of a roof

## Infrared -Thermography

discover insulation problems...

### Detection of leakages and humidity

Leakage of a heating pipe

Humidity under a window

### Detection of covered pipes

Wall heating system

Floor heating system

### Software for Building Thermography FORNAX

### Thermographic systems

- excellent thermal and geometrical resolution
- rugged housing and user-friendly operation
- advanced digital technology
- efficient analysis software for building applications
- numerous accessories
- good price/performance ratio
- low running costs

Based on long-standing practical experience in thermography we can offer any advice for the configuration of your thermographic system. We introduce the systems concerning your special application and provide the training of your staff.
