InfraTec on Hanover Trade Fair 2013 Live experience on infrared thermography

Sharpness encounters speed – this is the slogan for InfraTec in order to present the latest in its innovations on infrared thermography at the world's largest industrial trade show – Hanover Trade Fair 2013.

The fully redesigned exhibition area of 31 m² focuses on the outstanding high-performance thermographic cameras of the VarioCAM[®] High Definition and Imager[®] 9300 series that are characterised by their excellent geometrical resolution in Megapixel format, extremely high frame rates up to 4,500 Hz as well as their comprehensive trim levels.

In addition, get to know more on the possibilities of high-speed data acquisition and the highly efficient analysing options provided by the thermographic software family IRBIS[®] 3 and the variety of thermographic automation solutions for most diverse applications. The InfraTec applications engineers are pleased to demonstrate this technology directly on-site and are at your disposal for comprehensive technical discussions.

Meet us also at our next trade shows: SENSOR+TEST 2013 (14. – 16.05.2013 in Nuremberg) or Control 2013 (14. – 17.05.2013 in Stuttgart).
